## Welcoming Work Experience Students

We recently welcomed two students from South Craven School on a one week placement.

Joe and Will are interested in a career in Engineering and we put together a programme which introduced them to the varied Engineering roles and functions in our business. These included spending time with colleagues in the Machine Shop, Assembly and Maintenance as well as in Inspection and Engineering.

Will, on the left, and Joe with Alice Smithhurst, who organised the students' day with the Inspection team

Feedback from the students was that they enjoyed their experience: Joe said "I thought it was very helpful and did an excellent job of informing me about Fives as a company, what working for you in the industry would be like and where I could progress too. Overall though I had a great time, the people were very welcoming and friendly and the food was fantastic."

Will commented that he was very thankful for all the team did. "It was a very pleasant week and also very interesting. The way it was set up was also very good, how early in the week we were shown around the whole place and then as the week went on shown more in-depth about each department and how they contribute to the end result."

It was a pleasure to have the students with us and thank you to everyone who spent time with them. This was the first time post-Covid that we've been able to offer work experience and we look forward to re-developing our links with South Craven, a school attended by many of our apprentices and employees over the years.
